

Episcopal Church of the Holy Spirit

PO Box 2365
Alabaster, AL 35007

May 11, 2011

Dear Friends in Christ;

Our thoughts and prayers go out to those who have suffered both personally and those who have damaged churches from the recent tornados. We have been dealing with Gary Cain and Rose Office Systems for several months now as we were planning and building a social, Christian education, and office building to go with our worship space.

Gary and his team have my highest recommendation. They listen well and they are upbeat and professional. We had a very specific budget and Gary and his team have worked as hard as we have to get the most out of our dollar.

We compared a traditional building with the modular building we purchased. We called another local church that used Rose and visited their modular building. We had an architect visit with Gary and investigate the structural differences of a modular and a traditional building. In short, we had the luxury of time to do some real investigating; we found solid buildings and satisfied customers.

We found the modular option:

- Solidly constructed, easily comparable to stick construction.
- Cost effective, we got about twenty percent more space within our budget.
- Fast, we will be in our new building much sooner than with traditional construction.

Please feel free to call or drop by and see if this type of construction will help meet your needs.

May God Bless

The Rev. H. Lee Lowery
Rector, Episcopal Church of The Holy Spirit
