Re: Rose Building Systems LLC
Garry Cain

Gentlemen:

Please be advised that we have been involved in two projects with Rose Building Systems LLC one in 2001 and one recently completed this year. Both projects were for the same demanding customer and both buildings were delivered on time and to the customer's satisfaction.

The first project delivered in 2001 was approximately 6000 square feet and is still in use today. On this project our company installed building footers and Rose delivered and set up the building.

The second project a 9000 square foot building was ordered in mid November 2007 and delivered before year end. Do to circumstances beyond our and Rose's control the modules had to sit unassembled for some three months. Unknown to everyone involved one of these modules sustained some roof damage and damage to the protective shipping cover during delivery. When the damage was discovered during set up Mr. Cain with Rose Building Systems promptly came to the site evaluated the damage and immediately had it repaired. On this project Rose not only provided set up and assembly services but also installed all building footers.

I would not hesitate nor do I believe my customer would hesitate to use Rose on future projects of this nature. Garry and his office staff and set up crew always do what they say they are going to do when they say they are going to do it.

Sincerely,
FOUNTAIN CONSTRUCTION COMPANY, INC.

Chris Fountain
